

Epileptic Syndromes in Infancy, Childhood, and Adolescence, 6th Edition: A Comprehensive Guide for Healthcare Professionals and Families

Epilepsy in Children: A Complex Condition

Epilepsy is a common neurological disorder that affects children of all ages. It is characterized by recurrent seizures, which are sudden, uncontrolled disturbances in the brain's electrical activity. Seizures can vary in type and severity, and they can have a significant impact on a child's development, behavior, and quality of life.
